The union of an Italian leader company in the agri-food sector and its historic milk brand
**About Newlat**

**Newlat SPA** is an Italian company whose business core is placed in the agri-food sector. It is one of Italy’s leading producers and provides the market with its high-quality products every day.

Newlat was founded in 2004 and quickly became a leader thanks to the acquisition of some of the most important Italian brands and plants with great traditions.

Newlat is one of Italy’s leading producers of:

- Milk and dairy products
- Pasta and baked goods
- Gluten free products
- Low protein products
- Baby food
Polenghi's factory was founded in Lombardy in 1870 and since the beginning it became famous for the quality and innovation of its products. In 2009 Newlat acquired the factory and Polenghi as brand.
Polenghi at the beginning of the 20th century was in Italy the only producer of powdered milk. Later in 1954 Polenghi also introduced long-life milk.
A large production experience, a careful focus on selecting the best, freshest, most wholesome milk and a good dose of passion: these are the strengths of Polenghi which have always made its products so special and innovative.
UHT Milk

The milk comes from selected Italian farms, located close to the production plant. The milk delivered to the factory is immediately packaged in order to maintain its organoleptic and nutritional properties for longer.
UHT Milk

- Trio 3x200ml with straw in a box of 24x200 ml
- UHT Whole Milk Tetra brik 1000 ml

NUTRITION DECLARATION for 100 ml

**PREPARATION INSTRUCTIONS**
Before preparing the feed, carefully wash and dry your hands. Sterilize bottle, teat and ring before use.

Boil the water and pour the right amount (according to the feeding guide) into the bottle at a temperature of 70°C.

Using the scoop provided, add the correct number of scoops of powder, levelling each scoop with the back of a clean dry knife.

Add the indicated amount of scoops of powder to the water (according to the feeding guide).

Cap the bottle and shake well to dissolve the powder.

Test the temperature of the milk on the back of your hand before feeding the baby. The temperature of the milk must not be above 37/40°C.
Infant Milk Powder Stage 2
(6-12 months)

Ingredients: skimmed milk powder, vegetable oils (sunflower oil, palm oil, soybean oil), lactose, maltodextrin, demineralised milk whey Protein in powder, mineral salts, vitamins, inositol, emulsifier: soy lecithin.

Contains: milk, soy.

IMPORTANT ADVICE
Incorrect preparation and storage may be cause of risks for baby's health. Carefully follow preparation and storage instructions.

• Prepare only one bottle at a time to be given to the baby immediately after preparation.
• Throw away the remaining milk in the bottle after feeding.
• Use only the enclosed scoop.

STORAGE INSTRUCTIONS
After use carefully close the cap and store in a cool dry place (not in refrigerator). The product must be consumed within 3 weeks of opening.
